

# What we heard

PlateLoop survey · students, school kitchen staff, hospital staff and office workers

DEMO DATA

50

responses

30

Students

8

Kitchen staff

6

Hospital staff

6

Office workers

## Students

30 responses

43%

leave food mainly because: **portion too big**

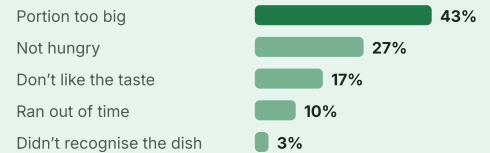

57%

would rather see **food groups** than calories

4.0

out of 5: interest in the **Loopi pet**

### MAIN REASON FOR LEAVING FOOD

→ **Loopi**: rewards the right portion, shows food groups instead of calories, and the pet gives students a reason to scan.

## Kitchen staff

8 responses

13%

know accurately **which dishes come back**

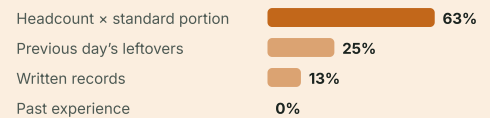

22%

of cooked food is **thrown away** (their estimate)

100%

want **waste shown by dish**

### HOW QUANTITIES ARE DECIDED

→ **Kitchen dashboard**: shows waste by dish and suggests tomorrow's order from what was eaten, with no forms to fill in.

## Hospital staff

6 responses

17%

**trust** their intake records

31

**minutes a shift** on intake records

100%

want **automatic intake** records

### WHEN A PATIENT WHO STOPS EATING IS NOTICED

→ **Loopi Care**: records every tray automatically and alerts nurses the same day a patient eats poorly.

## Office workers

6 responses

50%

feel an **afternoon energy dip** often or daily

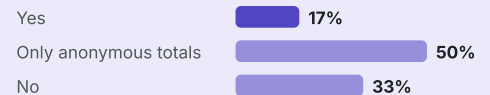

33%

**know the nutrients** in their lunch

33%

would **pre-order** to skip the queue

### SHARE MEAL DATA WITH EMPLOYER?

→ **Loopi Work**: shows the nutrients in each lunch, offers pre-ordering, and keeps meal data private by default.

Demo data: synthetic responses generated to demonstrate the analysis; not real survey results. With groups this small, one response moves a percentage by several points. Full analysis: plateloop-survey-analysis-DEMO.xlsx.
