Office workers

The problem, and the appetite for a fix

Each group's biggest pain point, next to how many want what PlateLoop offers.

THE PROBLEM

WANT PLATELOOP'S FIX

● Students

60%

leave food at least sometimes

60%

want to see what they ate

● Kitchen staff

88%

don't know accurately which dishes come back

100%

want waste shown by dish

● Hospital staff

83%

aren't confident intake records are accurate

100%

want automatic intake records

● Office workers

67%

don't know the nutrients in their lunch

67%

want a daily lunch suggestion

● Students 30 responses

Loopi

43%

leave food mainly because: **portion too big**

Food groups
Calories

57%
10%

57%

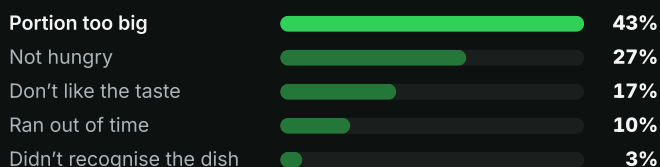

would rather see **food groups** than calories

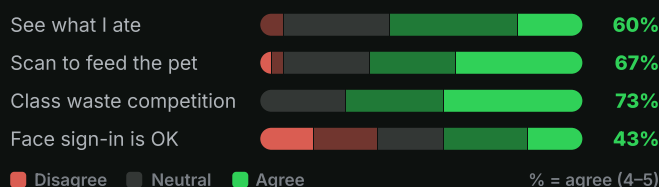

4.0/5

interest in feeding the **Loopi pet**

MAIN REASON FOR LEAVING FOOD

HOW STUDENTS FEEL

→ **Loopi** rewards the right portion, shows food groups instead of calories, and the pet gives students a reason to scan.

Kitchen staff 8 responses

Kitchen dashboard

1 of 8

know accurately **which dishes come back**

22%

of cooked food is **thrown away**, by their estimate

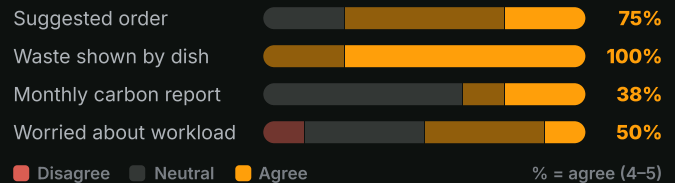

100%

want **waste shown by dish**

HOW QUANTITIES ARE DECIDED

HOW USEFUL WOULD THIS BE?

→ **Kitchen dashboard** shows waste by dish and suggests tomorrow's order from what was eaten, with no forms to fill in.

Hospital staff 6 responses

Loopi Care

1 of 6

trust their intake records

31min

a shift spent **writing intake records**

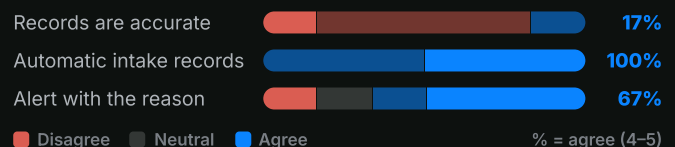

100%

want **automatic intake records**

WHEN A PATIENT WHO STOPS EATING IS NOTICED

HOW STAFF FEEL

→ **Loopi Care** records every tray automatically and alerts nurses the same day a patient eats poorly.

Office workers 6 responses

Loopi Work

50%

feel an **afternoon energy dip** often or daily

2 of 6

know the **nutrients** in their lunch

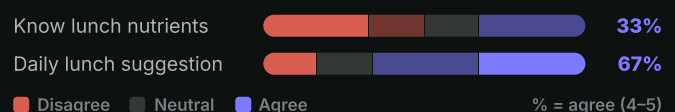

33%

would **pre-order** to skip the queue

SHARE MEAL DATA WITH EMPLOYER?

HOW OFFICE WORKERS FEEL

→ **Loopi Work** shows the nutrients in each lunch, offers pre-ordering, and keeps meal data private by default.
